

Supplementary Table 7

Parasite burdens of DBA +/+ and *ccr2*<sup>-/-</sup> mice

	+/+ (n = 4)	<i>ccr2</i> <sup>-/-</sup> (n = 4)	<i>P</i>
Ears	2.16 ± 0.59	3.94 ± 0.38	0.001
Spleen	0.18 ± 0.37	1.40 ± 0	0.001
Lymph Nodes	1.80 ± 0.29	1.94 ± 0.75	0.374

6 weeks after *Leishmania major* infection, DBA +/+ and *ccr2*<sup>-/-</sup> mice were sacrificed and tissue collected. Parasite burdens were determined as described previously (Sato N. *et al*, J. Exp. Med 2000, 192: 205-18). Ear sickness was serially measured and we found that the *ccr2*<sup>-/-</sup> mice had significantly more ear swelling two weeks after infection (data not shown).
