

Supplementary Table 8

Normal Th cell differentiation in T cells lacking expression of CCR2.

	+/+		<i>ccr2</i> <sup>-/-</sup>	
	Th1	Th2	Th1	Th2
IFN $\gamma$ (ng/ml)	276 $\pm$ 23.30	3.2 $\pm$ 0.54	246.7 $\pm$ 91.0	2.40 $\pm$ 0.5
IL-4 (ng/ml)	0.12 $\pm$ 0.001	30 $\pm$ 1.40	0.182 $\pm$ 0.02	28.6 $\pm$ 6.0

Highly purified naïve T cells from C57BL/6 mice were cultured under Th1 (IL-12, anti-IL-4) or Th2 (IL-4, anti-IFN $\gamma$ , anti-IL-12) polarizing conditions for 12 days. Their cytokine production was analyzed by ELISA following 24-48 h restimulation. One representative experiment of three performed is shown.
