

Urea-induced ROS generation causes insulin resistance in mice with chronic renal failure

Maria D'Apolito, ... , Michael Brownlee, Ida Giardino

J Clin Invest. 2014;124(10):1-1. <https://doi.org/10.1172/JCI78338>.

Addendum

Original citation: *J Clin Invest.* 2010;120(1):203–213. doi:10.1172/JCI37672. Citation for this addendum: *J Clin Invest.* 2014;124(10):4668. doi:10.1172/JCI78338. Concerns were recently raised with regard to the immunoblot images in Figure 5B, and it was unclear to the Editorial Board whether the position of the bands in lane 2 of the total IRS-1 blot and the O-GlcNAc was consistent with stripping and reprobing of the same membrane. An investigative committee at the University of Foggia found no evidence for image manipulation after comprehensive analysis of the available images by a noted expert in digital image analysis; however, the original raw data were unavailable for review due to a flood in the region. The authors have therefore performed a replicate experiment; the results (shown below) are consistent with the findings originally reported in the paper.

COLUMBIA UNIVERSITY
MEDICAL CENTER
Discover. Educate. Care. Lead.

NewYork-Presbyterian
The University Hospital of Columbia and Cornell

**CHAIR, DEPARTMENT OF
PATHOLOGY AND CELL BIOLOGY**
Columbia University College of Physicians & Surgeons and
PATHOLOGIST-IN-CHIEF
NewYork-Presbyterian/Columbia University Medical Center

Columbia University College of Physicians and Surgeons invites applications and nominations for the position of Chair, Department of Pathology and Cell Biology.

The Department's 105 full-time faculty include internationally recognized experts in the fields of anatomic, clinical, surgical, and molecular pathology. In 2013 the Department ranked 4th among pathology departments in NIH research support and its graduate program in Pathobiology and Molecular Medicine is one of the most active in the country. In the current fiscal year, the Department received 166 grant awards totaling more than \$25M; the Department's FY14 operating budget totaled \$96M.

The next Chair of Pathology and Cell Biology will be an academic pathologist who has demonstrated an ability to define a vision for the Department's clinical services in the context of unprecedented advances in technology and a rapidly changing health care environment. He/she will also foster and grow the Department's research portfolio. The Chair will work collaboratively with Columbia University and NewYork-Presbyterian Hospital leadership, building on the tradition of excellence in existing teaching, research, and clinical programs, while serving the pathology needs of the community at large.

The Academic Health Center Practice of Korn Ferry is assisting Columbia University with this important search. Please forward, as soon as possible, your application, including letter of interest, or nominations of appropriate candidates to: **Warren E. Ross, M.D.** and **John Ferry, M.D.**, c/o **Betsy Messina (betsy.messina@kornferry.com)**, Korn Ferry, 1835 Market Street, Suite 2000, Philadelphia, PA 19103
